

Akura

Engineered Steel & Precast Systems

Industrial Specialists

About Us

Akura is a leading industrial design and construction company providing industrial property solutions for over 49 years.

Our passion to prepare businesses for the future drives our business to better serve yours, and in turn, your customers.

With decades of experience in construction, building design and in-house manufacturing capabilities, we're focused on setting new benchmarks for industrial warehouse and factory space across the eastern states of Australia.

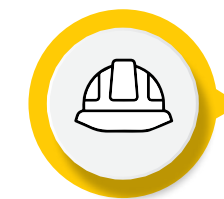

Company Values & Culture

Customer Satisfaction

Akura is a driven and experienced team that innovate to provide industrial development solutions and have a passion for high-quality outcomes and exceptional customer service.

Health & Safety

No project or deadline will ever be more important than getting our people home safely every day.

Our People

Everything we do is designed to deliver positive change for individuals, our customers, and the communities they live in.

How We Add Value

Building Consultancy

A long history in construction equips Akura with a wealth of knowledge in building design and construction methodology.

Design & Manufacturing

We design and manufacture structural steel and precast concrete panels in-house.

Logistics & Installation

We employ our own riggers, install and logistics teams, and are equipped with company-owned cranes, EWP's and transport fleet.

What is Akura's engineered steel and precast system and how can it save me time and money?

Akura's engineered steel and precast system is specifically designed to solve your industrial construction pain points and save you time and money.

It's all about design, quality and speed. The engineered steel and precast system has evolved over decades of experience by hands-on builders with a passion for quality buildings, built safely and efficiently producing the best possible return on investment.

Engineering, in-house manufacturing, logistics and installation by one company facilitates rapid delivery, on-site efficiencies and high-quality outcomes resulting in construction cost savings and faster returns.

The Akura Advantage

Simplicity.

Sourcing engineering, structural steel, and precast panels as a package from one supplier simplifies the construction process and eliminates the need to coordinate and manage individual trades. Simple.

Quality.

Design and detailed drafting of steel and precast by one team using the same software ensures unbeatable accuracy in ferrule and cleat placement. This results in seamless integration and uninterrupted installation. Precast panels formed with aluminium shutters and cast on polished steel beds achieve sharp lines, clean finishes, and stunning buildings. Quality earns.

Experience.

A wealth of knowledge, innovative design solutions, exceptional planning and quality structural components is fundamental to successful construction and tangible business outcomes. Experience saves.

Speed.

Time is money in the construction industry. Concrete panels manufactured in a temperature-controlled environment off-site reduces production and curing times. This also means that panel production can overlap with civil works on site. Akura's engineered steel and precast system will smash your program.

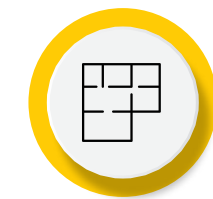

How We Add Value

Structural Design

Structural engineering of footings, steel, and precast panels. Shop drawing.

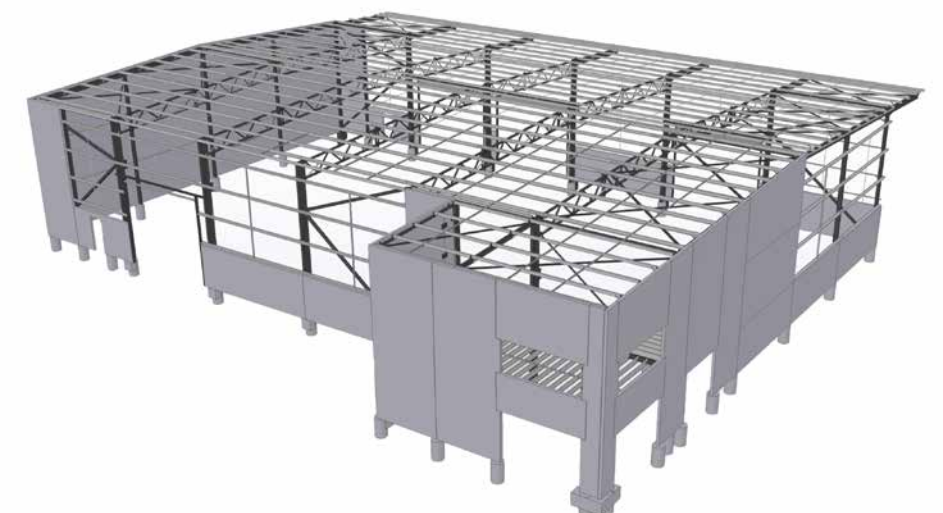

Steel and Precast

Structural steel, purlins and bridging. Precast panels, grouting and joint sealing.

Installation

Project management, steel erection, precast installation. WHS requirements.

Who Proves the Value of Our System?

- ☑ Builders
- ☑ Developers
- ☑ Owner-occupiers

What Industrial Project is Perfect for Engineered Steel & Precast Systems?

- ☑ Warehouses
- ☑ Industrial Units
- ☑ Factories & Manufacturing Facilities

Building Strong Partnerships for Long-Term Success

At Akura, we believe that success is built on strong, long-term relationships. Our commitment goes beyond delivering high-quality industrial construction solutions—we focus on understanding our clients' ongoing needs and providing lasting value that supports their growth.

One of our valued clients has partnered with us on multiple projects in Hume, including completed developments on Val Reid Crescent and Couranga Crescent, as well as an ongoing project on Paspaley Street. This continued collaboration reflects the trust, reliability, and efficiency we bring to every build.

Our collaborative approach, personal focus, and ability to be nimble is a compelling indication of why over 70% of our projects originate from repeat business and referrals.

By working together across multiple developments, our client benefits from:

- ✓ **Consistent Quality**
Ensuring the same high standards across all projects, with seamless execution and attention to detail.
- ✓ **Faster Project Delivery**
Our understanding of their requirements allows us to streamline timelines and optimise efficiency.
- ✓ **Cost Efficiencies**
Long-term collaboration leads to smarter planning, reduced risks, and better financial outcomes.
- ✓ **Dedicated Support**
A trusted partner who anticipates future needs and provides proactive solutions.

At Akura, we don't just construct buildings—we build trust, reliability, and lasting partnerships that stand the test of time.

TESTIMONIAL

Industrial Warehouse - Vineyard

"I am very impressed with the way the steel and panels went together so easily, there were no hiccups on site. I have always done my own tilt panels, but this system has led to me changing the way I do panels and steel."

Robert Calvert - Calcorp

TESTIMONIAL

Beard Industrial Units

"We engaged Akura because of their product and finishes. We're really happy with their workmanship and the experience we've had with our Project Manager."

Rasho Kovjanic - Monte Building Group

TESTIMONIAL

5 Watt Drive Industrial Units

"We couldn't be happier with the Akura team. Our Project Manager was great to work with, very approachable and did what he promised – couldn't have been any better."

David Reynolds - Reynolds Contracting

TESTIMONIAL

Warehouse & Office, Orange NSW

"The delivery and installation was all within our challenging schedule. The product exceeded our expectation. We are pleased to have appointed Akura for the supply and installation of our factory/warehouse."

Client from Central West NSW
